Meanwhile, we continuously optimize and reasonably arrange for the structure of assets and liabilities and diversify sources of funds according to the macroeconomic situation to ensure continuous and effective control of liquidity risk. We have specified the identification, measurement, monitoring and reporting of liquidity indicators.

We conduct monthly stress tests on our own crisis, market crisis and consolidation scenarios and forecast the gap in the coming month under stress scenarios to ensure that we can fill the financing gap with our liquidity bonds held at the discount rate predetermined. During the stress test at the end of December of 2023, under the maximum stress scenario, Hong Kong Branch could fill 2.34 times the cash flow gap through bonds sold at a discount.

To strengthen our capabilities of dealing with liquidity risk, we have formulated a contingency plan for liquidity risk, mainly including measures for early warnings and monitoring, crisis reporting mechanism, course of action and implementation procedures. We conduct drills of the contingency plan for liquidity risk annually, and timely assess and revise the plan based on needs.
